

ProDevice MMD360 destroyer

ProDevice MMD360 is a high-quality destroyer for the physical destruction of data carriers. It is an interesting alternative to fully automated devices available on the market. The machine is characterized by durability, reliability and compliance with data protection requirements. Due to its small size and light weight, the MMD360+ can be used in any office.

Benefits

Versatility and reliability

You can effectively destroy any digital media with an extremely durable device.

Convenience and flexibility

You can use the device in any location, even without access to electricity.

Good value for money

You will receive a high-quality destroyer at an economical price.

Why choose the ProDevice MMD360 destroyer?

- The device physically destroys 2.5" and 3.5" hard drives, SSDs, magnetic tapes, pen drives, tablets* and mobile phones*.
- Two modules with interchangeable steel pins for destroying media are standard.
- Unique technology used in the defense industry guarantees long-term durability of the device coating.
- The destroyer is operated manually, whereby it does not require a lot of physical strength from the operator.
- The device is very stable during operation and equipped with an anti-skidding gum to prevent it from moving.
- Manufactured in the polish ProDevice production center.

ProDevice App.

Scanning

Report generation

ProDevice mobile App for scanning media serial numbers and automatic report generation.

* Lithium batteries need to be removed from mobile phones and tablets before destruction/shredding process.

The ProDevice MMD360 ensures compliance with the following mandates, regulation and security guidelines

- DIN66399 | ISO/IEC 21964
 - H 3 for hard drives HDD
 - T 1 for magnetic tape media
 - E 1 for electronic datamedia
- DMS 2008: level A for physical HDD destruction

Destroying data media with the ProDevice MMD360 device causes disks, tapes, tablets or cell phones to be deformed and damaged. MMD360+ is a perfect solution for companies and institutions that care for only the highest standards related to protection of confidential data, defined by GDPR.

Technology used in the arms industry

The elements of the ProDevice MMD360 destroyer are nitrided: a special thermo-chemical treatment. Thanks to this, the top layer is extremely hard, and thus resistant to mechanical damage and abrasion. The outer shell formed on the metal surface protects the structure of the device against the adverse effects of external factors (e.g. humidity, temperature, etc.), securing it against corrosion. Therefore, the destroyer meets the most stringent operational requirements. Nitriding technology is successfully used in the defense industry to produce high-quality weapons.

Technical specification

ProDevice MMD360	
Part number	PDESMMMD360
Dimensions (with handle)	560 mm x 340 mm x 750 mm / 22 in x 13.4 in x 29.5 in
Weight	35 kg / 77.2 lb
Shipping case (option)	Yes
Warranty	5 years

The manufacturer reserves the right to update, improve, provide additional functionality, or otherwise introduce changes to the design of any products deemed necessary by the manufacturer.
