ProDevice DGX02
automatic media shredder

The mobile, automatic industrial shredder ProDevice DGX02 is the latest generation device for the final, physical shredding of any type of data carrier.
The device is dedicated to companies and institutions that regularly have larger amounts of storage media to destroy.
The shredder works quickly and reliably.

MADE IN POLAND

Benefits

We guarantee comfort and flexibility — with the help of the device you can destroy any type of storage medium, maintaining a high level of security in accordance with international standards.

We provide convenience and efficiency — you can automatically shred max. 3.000 carriers per hour.

We ensure durability and mobility — the possibility of transport by a delivery vehicle will allow you to use the device in various locations for years.

Why choose the ProDevice DGX02 automatic shredder?

- Hardened cutters shred all types of data carriers: hard drives (including server drives), optical and SSD drives, tapes for streamers, floppy disks, thermal transfer tapes, flash media, mobile phones*, tablets* and laptops*.

- The 5.5 kW engine is designed for continuous operation.

- In the class of industrial devices, the shredder is distinguished by small dimensions and weight. The ProDevice DGX02 can be transported to various locations in a van weighing up to 3,500 kg.

- A simple and intuitive control system means that the operation of the device does not require special operator qualifications.

- Destroyed data carriers are placed in a durable container with a capacity of 216 liters. It can be placed on a transport cart and easily transported to any location.

Mobile App.

Scanning

Making reports

ProDevice Mobile App. available and included to scan the serial number of the media and generate an automatic report.

*Lithium batteries need to be removed from mobile phones, tablets and tablets before the destruction/shredding process.

The ProDevice DGX02 ensures compliance with the mandates, regulations and security guidelines

- DIN66399 | ISO/IEC 21964

  H 5 for hard drives HDD
  O 2 for optical data media
  T 3 for magnetic tape media
  E 2 for electronic datamedia

- DMS 2008 / level C for physical HDD destruction

Destroying data carriers with the ProDevice DGX02 device causes disks, tapes, tablets or mobile phones to be crushed into small pieces. DGX02 is a perfect solution for companies and institutions that care for the highest standards related to the protection of confidential data, defined by GDPR.

Safety of use and industrial efficiency

The ProDevice DGX02 is safe to use. The sturdy legs of the shredder ensure its stability during operation. The automatic reverse of the cutting system protects the engine against overload in the event of a media jam. The drawer media feeding system is equipped with a contactor protection. Thanks to this, opening the drawer stops the cutters. The shredder can also be stopped at any time by pressing the emergency button.

High performance, versatility and reliability are appreciated by corporations and enterprises providing services for destroying data carriers.

Technical specification

	ProDevice DGX02
Engine power	5,5 kW (installation of a more powerful unit possible at an additional cost)
Performance	Up to 3.000 media/hour
Power supply	400V
Shred size	15mm
Overload protection	Yes
Auto stop on jamming	Yes
Auto start, reverse and stop	Yes
Safety features	Yes (door open & emergency button)
Acoustic level at idling speed	55dB
Shredder dimensions	880mm x 1350mm x 1500mm
Dimensions of plastic container for crushed storage media	800mm x 600mm x 450mm
Weight	700 kg
Warranty	2 years (possible warranty extension)

The manufacturer reserves the right to introduce changes to the design of devices, deemed necessary by the manufacturer to improve them.
