

ProDevice Mobile App

Meet the world's first devices for data deletion, media destruction and inventory of storage media compatible with an intuitive ProDevice mobile application. The application has been created to support ProDevice products and is available in standard and extended version. For each purchased device you will receive as many as 5 free user licenses.

CYBERSECURITY

POLAND**

Benefits

We guarantee convenience – while using the application it's possible to scan serial numbers, take pictures of carriers, record videos of the degaussing process and create clear reports.

We provide easy reporting of the entire process – possibility to export the report to .pdf and .csv.

We save time – automatic creation of photo documentation when using the extended version of the application in combination with the ProDevice ASM240+ degausser.

Combining the application with the ProDevice ASM240 degausser presents you the opportunity to:

- Access to the extended version of the application.
- Photographing and recording the process directly from the application and attaching this documentation to the report.
- Taking photos from the device level (the built-in camera automatically takes pictures of degaussed media and attaches the photos to the report) – applicable to the ASM240+ model.
- Access to the full report after logging into the device's wi-fi network.

Mobile App.

Scanning

Taking photos

Recording movies

Creating reports

The ProDevice App was made for users who want to create the full documentation connected with the process of demagnetization, destruction or inventory of data carriers.

ProDevice App on your mobile device:

- Possibility to download to IOS and Android devices.
- Intuitive, easy to use.
- Multilingual (available in 8 different languages).

8 languages:
 English, Polish, Italian,
 French, Spanish,
 German, Czech,
 Slovak

ProDevice application - easy creation of transparent reports

The scanning function gives you the ability to read the barcodes from different carriers - you can easily adjust the scanner to the type of the code. Serial numbers, photos and videos of the processes carried out, are exported to a report that the user can download to a mobile device or share directly from the application.

Technical specification

| | ProDevice App – standard version | ProDevice App – extended version |
|--|--|--|
| Supported devices | All ProDevice products | ASM240 Professional and ASM240+ degaussers |
| Number of licenses | Package of 5 licenses for each ProDevice product purchased | Package of 5 licenses for each ProDevice product purchased |
| Access | Free | Free |
| Serial number scanning | Yes | Yes |
| Taking photos | No | Yes |
| Recording movies | No | Yes |
| Creating reports | Yes | Yes |
| Access to the report from the device level | No | Yes |
